

INCIDENT MANAGEMENT SITUATION REPORT  
MONDAY, JULY 31, 2000 - 0530 MDT  
NATIONAL PREPAREDNESS LEVEL V

CURRENT SITUATION:

Eight new large fires were reported in the Northern Rockies, Rocky Mountain, Eastern Great Basin, Southwest, Southern California, and Southern Areas. Initial attack activity has been light to moderate, but an increase is expected with dry lightning forecast in Montana, Idaho, Nevada and Oregon. Containment goals were reached on ten large fires. Mobilization of aircraft, equipment, crews and overhead through the National Interagency Coordination Center is continuing at a steady pace. Very high to extreme fire danger indices were reported in numerous units throughout the 11 western states and in Texas. The Pentagon's Directorate of Operations for Military Support (DOMS) has been requested to supply one military battalion to assist in the fire suppression effort. The Training Cadre will begin training today for the Army's 3rd Battalion 16th Field Artillery in Ft. Hood, Texas.

EASTERN GREAT BASIN AREA LARGE FIRES:

Priorities are being established by the Great Basin Multi-Agency Coordinating Group based on information submitted via Wildfire Situation Analysis reports and Incident Status Summary (ICS-209) forms.

TWIN CREEK, Salmon-Challis National Forest. A Type I Incident Management Team (Stam) is assigned. This fire is 30 miles north of Salmon, ID near the Lost Trail Ski Area. Moderate fire behavior continues with torching especially in the subalpine fir. Numerous uncontained spot fires are causing problems. The team has also assumed responsibility for the nearby Reynolds Lake fire. Predicted high winds and isolated dry thunderstorms today will challenge containment efforts.

HIGH POINT, Wasatch-Cache National Forest. A Type II Incident Management Team (Carr) is assigned. This fire is 1.5 miles east of Logan, UT. Ten structures are threatened, along with watershed, microwave sites and powerlines. Observed fire behavior was torching and small uphill runs. Concerns include an urban interface area west of the fire.

OAK HILL, Uinta National Forest. The fire is near Alpine, UT. The fire has moved into American Fork Canyon and is threatening the cities of Alpine and Highland and the Timpanogos Cave National Monument. Structure protection is in place. Active spotting and torching has been observed. The fire is burning in oak brush and has moved into heavy timber. After today, this fire will be reported by the Wasatch Complex.

WEST FORK, Upper Snake River District, Eastern Idaho Area, BLM. This fire is five miles south of Lava Hot Springs, ID. Ten residences and ten commercial buildings are threatened in the community of Lava Hot Springs. Progress is being made toward containment.

OLDROYD, Fishlake National Forest. A Type I Incident Management Team (Hutchinson) and a Type II Incident Management Team (Ostman) are assigned. This complex now includes the Oldroyd, Mona West, Broad, Mourning Dove and

Yance fires near Richfield, UT. Downdrafts and strong winds have hampered firefighting operations on all the fires. Commercial property, several summer cabins and the town of Oak City are threatened.

WASATCH COMPLEX, Wasatch-Cache National Forest. A Type I Incident Management Team (Dague) is assigned. This complex consists of the Iron Mine Lake, Cottonwood, East Vivian and Wallsburg fires, all located southeast of Salt Lake City, UT. Fireline construction is progressing on the East Vivian fire. A firing operation last night was successful. Spotting continues to be a problem. Crews on the Wallsburg fire are making good headway. Mopup and rehabilitation efforts continue on the Cottonwood and Iron Mine Lake fires.

CLEAR CREEK, Salmon-Challis National Forest. Two Type I Incident Management Teams (Hart and Bateman) are assigned. The fire is 12 miles west of Salmon, ID. Extreme burning conditions and forecast red flag conditions today will challenge firefighting efforts. Extremely steep terrain is causing problems with rolling material and slowing fireline construction.

BURGDORF JUNCTION, Payette National Forest. A Type I Incident Management Team (Vail) is assigned. The fire is 23 miles north of McCall, ID. High cloud cover with moderating temperatures and relative humidity have resulted in decreased fire activity during the last burning period. Torching, spotting and some runs have been observed.

JOHN ALLEN, Dixie National Forest. The fire burning in ponderosa pine, fir and heavy ground fuels ten miles northwest of Escalante, UT. Four more crews are on the fireline and good progress has been made toward containment.

COFFEE POINT NORTH, Upper Snake River District, Eastern Idaho Area, BLM. A Type I Incident Management Team (Humphrey) is managing this and other large fires in the eastern Idaho area. Firefighters are making good progress toward containment. BISMARK, Northwest Utah State. This lightning-caused fire is 15 miles south of Fairfield, UT. It is burning in grass, sagebrush, pinyon pine and juniper. The south end of the fire has advanced toward Chlulos Canyon. Hot and dry conditions are impeding containment efforts.

MOONSHINE, Upper Snake River District, Eastern Idaho Area, BLM. This fire is burning in sagebrush, grass and scattered timber 13 miles east of American Fork, ID. Approximately 32 structures and Native American cultural resources are threatened.

MONUMENT CANYON, Sawtooth National Forest. This fire is 36 miles southeast of Burley, ID. The fire is wind-driven in grass, sagebrush, pinyon pine and juniper. The fire has grown toward the south, with hot, dry and windy weather continuing. Threats are to private lands and grazing.

SUPON, Upper Snake River District, Eastern Idaho Area, BLM. This fire is 20 miles north of Chesterfield, ID. It is burning actively in grass, sagebrush and scattered timber on state and private land. Active torching and spotting have been observed with passing storm cells. The threat is to critical wildlife habitat.

ELBOW, Arizona Strip Field Office, BLM. This fire is ten miles southeast of Mesquite, NV. The fire is being patrolled by air. No major problems have been noted.

RATTLESNAKE, Arizona Strip District, BLM. The fire is burning in sagebrush, pinyon pine and juniper south of St. George, UT. Crews continued to work toward containment. Helicopter bucket drops are supporting suppression efforts. Concerns are firefighter safety and protection of recent fire rehabilitation work.

NORTHERN ROCKIES AREA LARGE FIRES:

Priorities are being established by the Northern Rockies Multi-Agency Coordinating Group based on information submitted via Wildfire Situation Analysis reports and Incident Status Summary (ICS-209) forms. A Type II Incident Management Team (Swope) is managing the Missoula staging area.

CANYON FERRY COMPLEX, Helena National Forest. A Type I Incident Management Team (Waterbury) and a Type II Incident Management Team (Hoff) are assigned. This complex, located 12 miles north of Helena, MT, consists of the Bucksnot Fire and the Cave Gulch Fire. Flare-ups continue along the western boundary. The fire made major runs up Magpie Creek and crossed Hellgate Creek. Two additional structures have been destroyed.

FORT HOWES COMPLEX, Miles City Field Office, BLM. A Type I Incident

Management Team (Frye) and a Type II Incident Management Team (Colla) are assigned. This complex consists of the Stag Butte fire, Taylor Butte fire, and four others. The fire has moved within five miles of Ashland, MT. A burnout operation around several buildings was successfully completed. Numerous residences are still threatened.

TOBIN, Miles City Field Office, BLM. A Type II Incident Management Team (Cowin) is assigned. This fire is 26 miles northwest of Broadus, MT. Crews and dozers are making excellent progress toward containment. High temperatures are causing fatigue for incident personnel.

CROOKED, Clearwater National Forest. A Type II Incident Management Team (Johnson) is assigned. The fire is burning in logging slash 50 miles southwest of Missoula, MT. The fire has spotted across Rock Creek and is one mile from the Montana border. Threatened resources include wildlife habitat, private timber land, historic trails and buildings near Lolo Pass.

COUGAR CREEK, Beaverhead-Deerlodge National Forest. A Type II Incident Management Team (Gauger) is assigned. The fire is 30 miles southwest of Philipsburg, MT. Fire activity on the south end increased yesterday afternoon. Spotting is occurring one half to one mile away.

SPREAD RIDGE, Lolo National Forest. A Type II Incident Management Team (Specht) is assigned. This fire is 19 miles east of Seeley Lake, MT. The fire was ignited by lightning on 7/19 and has recently become active. Trails in the Monture drainage have been closed.

UPPER MONTURE COMPLEX, Lolo National Forest. A Type II Incident Management Team (Doman) is assigned. This complex, formerly known as the Seeley Complex, is 34 miles northeast of Missoula. Trail and area closures have been initiated in the Monture Creek drainage and in the Bob Marshall Wilderness.

AVERAGE BAD DAY, Southern Land Office, Montana State Department of Natural Resources and Conservation. This fire is ten miles south of Roundup, MT. Extreme running fire behavior has been observed.

DAILY, Miles City Field Office, BLM. This fire is five miles northwest of Ashland, MT. Dozers have completed fireline around most of the fire. Mopup on the west side will be time consuming because of the high number of snags.

ROCKY MOUNTAIN AREA LARGE FIRES:

DEAD HORSE, Casper District, BLM. A Type II Incident Management Team (Hartman) is assigned. This fire was caused by lightning 12 miles south of Casper, WY. The fire has reached Highway 220 and nearby structures are threatened. Other threats include a ski area and radio towers on Casper Mountain.

MIDDLE ENOS, Worland District, BLM. A Type II Incident Management Team (Gardner) is assigned. The Enos and Middle Enos fires have combined under this name. The fires are burning in sagebrush and limber pine 20 miles south of Meeteetse, WY. Spotting and crowning fire behavior is occurring in very dry fuels. Threatened resources are oil wells and wildlife winter range.

SOUTH GRIZZLY, White River National Forest. A Type II Incident Management Team (Bustamante) is assigned. The fire is in a remote area 11 miles north of Glenwood Springs, CO. Crews continue to work toward containment.

WARM SPRINGS, Worland District, BLM. This fire is burning in sagebrush and juniper fuels seven miles east of Thermopolis, WY. A nearby oilfield is threatened. The fire crossed containment lines on the east side, but that area has been controlled. A burnout operation was initiated, then aborted, when conditions were too unstable to finish. The burnout will be attempted again today.

SOUTHERN CALIFORNIA AREA LARGE FIRES:

MANTER, Sequoia National Forest. A Type I Incident Management Team (Studebaker) is assigned. This fire is 15 miles northeast of Kernville, CA. The fire spread has been in the Dome Land Wilderness and Chimney Peak Wilderness. Eight residences and eight outbuildings have been confirmed destroyed in the Kennedy Meadows area. Structure protection operations are ongoing. Crews are making significant gains on the southwest edge of the fireline.

EDISON, Sequoia National Forest. A Type II Incident Management Team (Tiede) is assigned. The fire is 7 miles northeast of Springville, CA. The communities of Doyle Springs and Wishon are threatened.

PECHANGA, Riverside Ranger Unit, California Department of Forestry. The fire is five miles east of Temecula, CA. It started on the Pechanga Indian Reservation and has burned into the Agua Tibia Wilderness of the Cleveland National Forest. Good progress has been made on meeting structure protection objectives.

PLASKETT 2, Los Padres National Forest. A Type I Incident Management Team (Gage) is assigned. This fire is 25 miles north of Cambria, CA east of Highway 1. Crews are conducting a burnout operation along dozer and handline from South Coast Ridge Road to the bottom of Willow Creek.

HAPPY, California Desert District, BLM. The fire is north of Trona, CA. This fire is burning in pinyon pine and juniper intermixed with desert shrub in extremely steep terrain. Higher humidity and decreased winds have slowed the fire's spread. Temperatures up to 114 degrees are hampering containment efforts.

WESTERN GREAT BASIN AREA LARGE FIRES:

Priorities are being established by the Great Basin Multi-Agency Coordinating Group based on information submitted via Wildfire Situation Analysis reports and Incident Status Summary (ICS-209) forms.

SOUTH CRICKET, Elko Field Office, BLM. A Type II Incident Management Team (Burdick) is assigned. This fire is 15 miles northeast of Wells, NV. The fire is still exhibiting extreme behavior with active crown fire. Severe weather conditions, continuous, fully cured grasses and extremely dry fuels are driving the fire. Threats are to residences, livestock, grazing land, endangered species, powerlines, the railroad and cultural sites.

COYOTE, Ely Field Office, BLM. A Type II Incident Management Team (Kearney) is assigned. This fire is burning 40 miles northeast of Pioche, NV. High temperatures and low relative humidity have resulted in another day of intense fire behavior, including crowning and torching in pinyon pine and juniper. The fire has spread across the Utah state line. Approximately 15 structures are threatened.

COTTONWOOD, Carson City Field Office, BLM. This fire is burning in pinyon pine and juniper 30 miles southeast of Lovelock, NV. Rolling debris and spot fires continue to impede containment efforts.

PHILLIPS RANCH, Humboldt-Toiyabe National Forest. This fire is burning in

mixed conifer 50 miles southeast of Ely, NV. The incident will be managed by the Type II Incident Management Team that is on Coyote fire. No significant runs have been reported in the past 24 hours. Firefighters are using natural barriers to help contain the fire.

SOUTHWEST AREA LARGE FIRES:

RIDGE, Fort Apache Agency. A Type II Incident Management Team (Leech) is assigned. This fire is four miles west of Carrizo, AZ. Most of the fire's activity is occurring in interior pockets. Crews are making good progress securing the west and north flanks. A microwave tower, a major power line, a structure and timber resources are threatened.

HONEY WELL, Navajo Area Office, BIA. This fire is 25 miles northwest of Window Rock, AZ. Crews are making good progress toward containment. An alert for evacuations is still in place.

GOLF, Coconino National Forest. The fire is in a remote area 20 miles east of Camp Verde, AZ. It was ignited on 7/21 by lightning. Fuels are ponderosa pine, pinyon pine and juniper. Agency officials are monitoring the fire daily.

BLOODGOOD, Gila National Forest. These lightning-ignited wildland fires are being managed to accomplish resource objectives. A Fire Use Management Team (Adams) is assigned. The Bloodgood fire (2000 acres) and the Graves fire (200 acres) are both burning in the Gila Wilderness 30 miles north of Silver City, NM.

WALL, Albuquerque Field Office, BLM. The fire is burning in a remote portion of the El Malpais Wilderness 20 miles southwest of Grants, NM. The fire is being monitored by BLM personnel. Little growth has occurred in the past three days.

SOUTHERN AREA LARGE FIRES:

CHEROKEE, West Texas Counties. The fire is burning in rough terrain 80 miles northwest of Austin, TX. Downdrafts from passing thunderstorms have caused strong shifting winds. One house and a barn are threatened.

UNION WELLS 2, Texas State Forest Service. This fire is 60 miles northeast of Houston, TX. No new information was received. This will be the last report unless new information is reported.

OUTLOOK:

\*\*\* A FIRE WEATHER WATCH IS POSTED IN SOUTHEAST OREGON AND SOUTHWEST IDAHO FOR POSSIBLE DRY LIGHTNING \*\*\*

\*\*\* A FIRE WEATHER WATCH IS POSTED IN NORTHERN AND CENTRAL WYOMING FOR HOT AND DRY CONDITIONS AND DRY THUNDERSTORMS \*\*\*

\*\*\* A FIRE WEATHER WATCH IS POSTED IN SOUTHCENTRAL AND SOUTHEAST MONTANA FOR LOW HUMIDITIES AND DRY THUNDERSTORMS \*\*\*

\*\*\* A FIRE WEATHER WATCH IS POSTED IN CENTRAL MONTANA FOR DRY THUNDERSTORMS POSSIBLY CONTAINING GUSTY AND ERRATIC WINDS \*\*\*

\*\*\* A FIRE WEATHER WATCH IS POSTED IN WESTERN MONTANA FOR LOW HUMIDITIES, HIGH HAINES INDEX, GUSTY WINDS AND ISOLATED DRY LIGHTNING \*\*\*

\*\*\* A FIRE WEATHER WATCH IS POSTED IN CENTRAL, EAST CENTRAL AND WEST CENTRAL NEVADA FOR DRY THUNDERSTORMS \*\*\*

\*\*\* A FIRE WEATHER WATCH IS POSTED IN THE CENTRAL IDAHO MOUNTAINS FOR EXTREMELY LOW HUMIDITIES AND GUSTY WINDS \*\*\*

\*\*\* A FIRE WEATHER WATCH IS POSTED IN NORTHEAST OREGON AND SOUTHEAST WASHINGTON AND PARTS OF CENTRAL OREGON FOR WINDY CONDITIONS AND VERY LOW FUEL MOISTURES \*\*\*

Hot and dry conditions will persist across the western United States. A number of fire weather watches have been issued for dry lightning, winds or low humidities. Dry lightning can be expected in parts of Nevada, Idaho, Oregon and Montana. An advancing trough and dry cold front will bring increasing winds to the Pacific Northwest, especially along the east slopes of the Cascades.

Temperatures will again reach the 90's to mid 100's across much of the west. Humidities will be in the single digits and teens.
